Shawn, also I'm not sure how Marilyn came up with 6 feet. I didn't provide that number but she may have reviewed the closure report. Jean

OK. I'm en route to San Francisco so I won't be able to get you an updated site map. You could add "Old" Hwy 65 to the location text for clarification. Jean

No time has run out. I have made few corrections that made sense. such as the Site No ARD instead of AKD. I wish we had updated the location. If you want you can send the updated location map page and I will see if replacing that makes sense. Also Egan got from you that in places nearly 6 ft was excavated. In such case the effective cover is excvated depth+ 6 inches because the voids were filled with fresh soil.
